VSAFE MEDICAL FACE MASK PROTECTION AGAINST COVID-19

THE NEED OF WEARING FACE MASK

“ The best way to prevent illness is to avoid being exposed to this virus.”

The virus is thought to spread mainly from person to person.

- ✓ Between people who are in close contact with one another (within about 6 feet).
- ✓ Through respiratory droplets produced when an infected person coughs, sneezes or talks.
- ✓ These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- ✓ Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

Singapore scientists and doctors conducted an experiment which proves that properly-worn masks are effective in helping to prevent the spread of COVID-19

SPECIALIST IN PERSONALCARE

**NOT ALL FACE MASK ARE
EFFECTIVE**

**VSAFE FACE MASK ARE
TESTED BY TUV SUD PSB
WITH BFE >99.9%**

**IT IS EFFECTIVE AS YOUR
FIRSTLINE PROTECTION
FOR YOUR FAMILY**
